

Next Generation Visitor Management

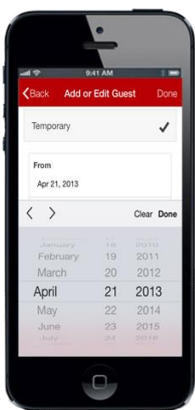

The next generation in visitor management! Gate Sentry is completely mobile and links your residents directly to your security team via mobile applications, eliminating outdated paper logs and expensive hardware. Now, residents manage their own guest lists in real-time and your security staff has the most up-to-date and accurate visitor information available.

RESIDENT BENEFITS

The resident's mobile app can be downloaded directly to the resident's iPhone, iPad, or Android smartphone or tablet and allows the residents to manage their personal profile and contact information, manage guest and vendor lists, and track visitor history. With access to visitor information from anywhere using the mobile app, residents now manage their own visitor list in real-time, ensuring a more secure property with accurate visitor access and reduced wait times.

▪ Real-time Visitor Updates

Add approved guests and vendors to visitor list in real-time from anywhere in the world

▪ Manage Visitor Duration

Set authorization dates for temporary guests or allow friends and family to be granted access indefinitely

▪ Track Visitor History

Visitor log available in real-time on owner's mobile device, allowing easy access to visitor history, complete with date and time stamps

▪ Guest Arrival Notifications

Notifications via mobile app or email

▪ Other Key Benefits

- Pre-approved guest, vendor, and watch lists
- Multi-resident notices for shared vendors
- Utilize pass codes for additional security
- Manage contact info in prioritized order
- Additional approvers while vacationing
- May be integrated with community website

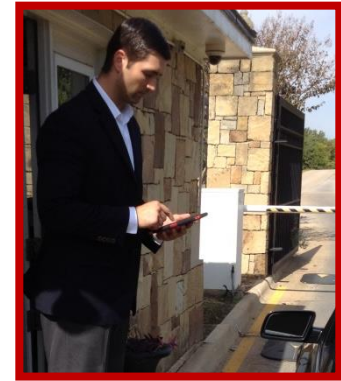

▪ Available for Android & iOS

SECURITY BENEFITS

The security staff's mobile app is continually updated in real-time with resident changes for accurate visitor information, which eliminates resident calls, handwritten paper logs and outdated visitor data.

Without leaving the visitor's vehicle, the security staff can verify the visitor's identity, grant access to the visitor and send a mobile notification to the resident. Gate Sentry enhances security staff professionalism while improving security of the community.

Real-Time Information

Resident updates are pushed immediately as live visitor data, ensuring accurate and streamlined visitor processing

Mobile Cloud Code Technology

Cloud code data management allows for truly mobile access; no dependence on computers, scanners, printers or kiosks for visitor data management

Integrated with Community Web

Web access can be integrated into the community's website to allow single entry login for non-mobile users

Other Key Benefits

- Entry notifications to multiple residents who share vendors
- Track & report visitor trends
- No computer/printers to purchase
- No badging or printing costs
- Secure, encrypted storage/backup

Eliminates Outdated Technology

The cloud based mobile app and data storage eliminates handwritten logs, computer or web based systems, and outdated paper visitor lists, while providing full user mobility and valuable visitor access reporting capabilities

Visitor Recognition Via Stored ID's

Visitor identification through stored ID's reduces processing time for frequent visitors and improves professionalism of security staff in greeting your guests

Multiple Owner Management Tools

Residents can manage their visitor lists via the mobile app, the GateSentry.com access portal, their community website, or directly through the security staff

Security staff can also update resident guest lists directly in Gate Sentry as approved or requested by the resident
